PROJECTS

Mobile Application for Car Rental Booking - Final Year Project

📅 11/2024 - 07/2025   📍 Clickngo

This mobile application allows users to browse and book rental cars through an intuitive interface developed with Flutter and Dart. A MySQL database is used to store information related to users, vehicles, and reservations. A REST API ensures communication between the application and the database, providing a smooth and responsive experience.

Car Rental Booking Website - Desktop Application for Car Rental Management

📅 01/03/2025 - 30/08/2025   📍 JMCars

This mobile application allows users to browse and book rental cars through an intuitive interface developed with Flutter and Dart. A MySQL database is used to store information related to users, vehicles, and reservations. A REST API ensures communication between the application and the database, providing a smooth and responsive experience.
